

Cleaning Just Got Easier!

- Save Water!
- Save Time!
- Save Money!

Install the compact, patented diverter valve one time only on every showerhead (your guests won't even know it's there). Then supply each housekeeping cart with a "quick-connect & detachable" 6 foot hose with sprayer to take from room to room. When the hose snaps into the diverter valve, water flows only when the sprayer lever is pressed – never from the showerhead. The powerful sprayer lets room attendants thoroughly rinse away dirt and chemicals faster, using less water!

**Your Room Attendants
will love you!**
